

Ticketing and Licencing

AHC32816 **Certificate III in Rural Operations**

Regional Skills Training

Providing training solutions for rural and regional Australia

Course overview

Regional Skills Training (RST) Ticketing and Licencing Program offers you the opportunity to upskill, gain tickets and develop a safe system of work.

This program is suited to all sectors across primary industries including broadacre cropping, livestock, pastoral, mixed farming enterprises, dairy, fruit and vegetable, viticulture, nurseries, irrigation and production horticulture.

RST can work with you to tailor a training program that suits the individual needs of individuals and businesses.

Topics

MOBILE PLANT OPERATION

If you are interested in obtaining mobile plant competencies, you can do this as part of your course. You need to have access to the appropriate machine in your workplace or attend RST's on-site training and be able to demonstrate operating the machine at work. Via self-paced theory and practical on-site assessments, competencies can be gained in the operation of:

- > Front end loader*
- > Civil articulated loader*
- > Skid steer*
- > Backhoe loader*
- > Excavator*
- > Telehandler*
- > Roller

Options marked with an asterisk (*) are available on-site at RST to gain additional competencies in machinery that may not be readily available on their own property.

FORKLIFT

Where sufficient demand is identified, forklift workshops will be held in local regions. These workshops will involve both theory and practical assessments. Where there is not adequate local demand, we will advise you of your closest workshop options.

Please note, the forklift course is a requirement to obtain a licence.

Once completed, you will need to apply to SafeWork SA who issue the forklift licences in South Australia. A fee is payable at a Service SA outlet (a similar process to getting a driver's licence).

SAFELY RIDE QUAD BIKES

- > Completed via a self-paced theory plus a practical on-site assessment
- > Introduction to the hazards and risks in using quad bikes
- > What is safe operation?
- > What is correct personal protective equipment?
- > What you should never do on a quad bike

WELDING AND WORKSHOPS TOOLS

A 3 day practical and theory workshop, this topic is an introduction to farm welding processes and the use of relevant power and hand tools for the beginner welder.

ADVANCED WELDING

A 3 day workshop for competent farm welders to advance their skills, this workshop will see students gain skills for retrofit, building from start and repair elements. As a part of this topic, an on-farm project will need to be completed within 6 months of the workshop.

MACHINERY MAINTENANCE

For the beginner in machinery maintenance, this workshop is completed via a 2 day practical and theory based workshop. Students will learn basic machinery and care of machines and engines, including small motors.

WORKING AT HEIGHTS AND IN CONFINED SPACES

Attend a 1 day theory and practical workshop to gain your ticket to work safely at heights and work in confined spaces. These tickets are important for people who work with field bins, silos, and heights such as roof maintenance, climbing ladders or any situation where a fall could occur.

SPRAY SOLUTIONS CHEMICAL ACCREDITATION

For new or re-accreditations, completion of the Spray Solutions program enables you to purchase, transport, use and store S7 chemicals.

Spray Solutions can be completed via open learning including a paper based or online e-learning. A face to face workshop aimed at the introductory level is available also. All training options require students to provide evidence of some practical activities completed in the workplace.

CROP AGRONOMY/PEST DISEASE AND WEED MANAGEMENT

Identify the requirements, deficiencies and problems in your crop or pasture.

Available via online learning.

CHAINSAW

A 2 day practical and theory workshop:

- > Maintenance and servicing of your chainsaw
- > Chainsaw safety, cutting techniques and plenty of trimming and cutting practice
- > Obtain your chainsaw ticket on successful completion
- > Training and assessment is conducted by Logging Investigation and Training Association Inc (RTO Code 0577)

FIRST AID

Where sufficient demand is identified a 1 day first aid workshop will be held in local regions. These workshops involve both theory and practical assessments.

Core units of Competency

Students enrolled in AHC32816 Certificate III in Rural Operations are required to complete the core units of competency below to exit with a qualification:

- > AHCWHS301 **Contribute to work health and safety processes**
- > AHCWRK309 **Apply environmentally sustainable work practices**

Funding and eligibility information – WorkReady

Subsidised training places are available subject to eligibility through the South Australian government WorkReady initiative. For further information and to check your eligibility visit: www.skills.sa.gov.au.

Accessing WorkReady funding may affect your eligibility for future funding.

Payment plans are available if needed.

A concession rate is available if you are eligible. Refer to the course fee sheet for cost and concession details.

If you are looking to do a traineeship under a Training Contract, RST can put you in touch with an apprenticeship network provider consultant who can advise on eligibility and arrange the paperwork for your Training Contract.

Delivery regions

You can complete your training from anywhere in South Australia. Face to face workshops are conducted where sufficient demand is identified in your local region. Online delivery is available for some topics.

Frequently asked questions

WHEN CAN I START?

You can enrol and commence your training at any time.

WILL I NEED TO COMPLETE ASSESSMENTS?

The Ticketing and Licencing Program assessment methods vary between topics. You may be required to complete theory and/or practical assessments, competency conversations, workplace demonstrations, or supply photo and video evidence.

DO I NEED TO HAVE ACCESS TO ANY SPECIFIC EQUIPMENT TO COMPLETE THIS COURSE?

Students need to wear work boots and appropriate work wear for practical workshops and have access to a laptop or tablet and a smart phone.

DO I NEED TO COMPLETE A LANGUAGE, LITERACY AND NUMERACY ASSESSMENT TO ENROL?

As per government funding and training standards, RST is required to determine the support needs for students. As such, RST requires all non-school based students to complete an upfront assessment of needs process (UAN).

A suitability and support needs checklist will be completed as part of the enrolment process. Students will need to complete a snapshot of reading and numeracy indicator assessment (SRNI). Where language, literacy and numeracy barriers are identified, student support will be provided.

HOW LONG WILL MY TRAINING TAKE?

On average to gain a qualification in ticketing and licencing, the timeframe is usually 18 months to 3 years, depending on the student needs and farming commitments. You are able to complete tickets and attend workshops at your own pace.

NEXT STEP

Contact RST to discuss your training needs and we will work with you to develop a suitable training plan.
